PROJECT INVOLVEMENT

- **Car-Care Application**

A Java Swing application. It includes CRUD functions using JAVA. The Care Service Center application helps manage orders, suppliers, employees, and generate reports efficiently.

Tech: **Java, MySQL.**

- **Student Management System**

A web-based Student Record Management System with a user-friendly UI and a REST API for managing student records. Features include Insert, Update, Search, and Delete operations using Node.js, JSON, and AJAX. Data is dynamically updated without page reloads.

Tech: **HTML, CSS, JavaScript, jQuery, AJAX, Node.js, JSON.**

- **CRM System**

This CRM system is a full-featured business dashboard built with Laravel 10. It supports user authentication (via Laravel Breeze), customer management, proposal & invoice generation, transaction tracking, email notifications (using MailTrap) and payment processing through Stripe. Designed for speed, scalability and modularity perfect for businesses.

Tech: **Vue.js, PHP, MySQL, JavaScript**

- **Ecommerce-Website**

A full-stack e-commerce app built with Laravel and Vue.js, this project features user authentication, product listings, cart & order management, and a modern responsive UI. It's designed as both a portfolio piece and a learning platform for integrating PHP back-end APIs with Vue front-end workflows.

Tech: **Vue.js, PHP, MySQL, JavaScript**

- **Banana-game**

Banana Game is a fun Vue.js and PHP web game using the Banana API to generate math challenges. Players solve problems quickly to collect bananas across three difficulty levels.

Tech: **Vue.js, PHP, MySQL, JavaScript, Banana API**

- **Coffee Card App**

Coffee Card App is a simple and intuitive app built with Flutter and Firebase. It lets users track coffee purchases and loyalty stamps, create café cards, add stamps for each visit, and view reward progress — making it easy to manage coffee loyalty programs in one place.

Tech: **Flutter, Firebase**
